

Green & Sustainable Wastewater Treatment

~ 2 workshops ~

Drs. Brian Slater, Karen Mancl and Mike Rowan
The Ohio State University

July 19, and
August 1, 2017

Molly Caren Agricultural Center
Home of the Farm Science Review
Highway 40, just west of Lafayette
Near London, Ohio

Sponsored By:
The Ohio State University Extension

All events feature field work –
so dress for the weather and be prepared to get wet and dirty.

Workshop Schedule

Septic System Siting and Soil Spatial Diversity

July 19 9:30 – 4:30 Molly Caren Ag. Center

- Ohio's soil natural resource
- Using soil surveys
- Mapping soil features at local scale
- Evaluating soils in the landscape
- Identifying system location and limitations
- Documenting site and soil evaluations

Bring a copy of your Munsell color book – if you don't have one, order one with your registration.

Wastewater Reuse Systems with Spray Irrigation

August 1 9:30 – 4:30 Molly Caren Ag. Center

- Site and soil requirements
- Treatment requirements and system design
- Equipment specification – sprinklers, pumps and controls
- Winter irrigation

Remember - This will be field instruction so dress for the weather and be prepared to get dirty.

CEUs

Both workshops have been submitted to the Ohio Department of Health and the Sanitarian Registration Board for 6 hours of continuing education credit.

Who Should Attend

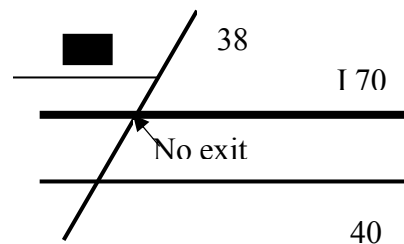

Consulting soil scientists, sanitary engineers, registered sanitarians and others who design small and onsite wastewater treatment systems.

Registration

Register for 1 or both workshops. The registration fee includes workbooks, all materials for the workshop, lunches and breaks. If you already own a Munsell Soil Color Book, bring it with you to the class.

Location:

Molly Caren Agricultural Center
Home of the Farm Science Review
Highway 40, just west of Lafayette
Near London, Ohio

The log cabin is just off Highway 38. Take the first turn to the west on 38 just north of Interstate 70. The parking lot is on the north side of the road. Note: Highway 38 does not have an exit off I 70. Exit onto Highways 42 to the east or 56 to the west and drive south to Highway 40.

Signs will direct you to parking and registration. For a map check the web site for the Soil Environment Technology Learning Lab www.ag.ohio-state.edu/~setll

In cooperation with:

Ohio Department of Health
Farm Science Review
Madison County Health Department
Ohio Onsite Wastewater Association
Ohio State University Research Foundation

Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the US Department of Agriculture, Roger Rennekamp, Director, Ohio State University Extension.

All educational programs conducted by Ohio State University Extension are available to clientele on a non-discriminatory basis without regard to race, color, creed, religion, sexual orientation, national origin, gender, age, disability or Vietnam-era veteran status.
